Description:																	
The V-22 is a tilt-rotor vertical takeoff and landing aircraft currently being produced for joint service application. The program provides an aircraft to meet the amphibious/vertical assault needs of the Marine Corps, the strike rescue needs of the Navy, and supplements USSOCOM special mission aircraft. The aircraft is capable of flying 2,100 miles with one refueling, and gives the Services the advantage of a Vertical/Short Takeoff and Landing (V/STOL) aircraft that can rapidly self-deploy to any location in the world.																	
The current procurement objective is 460: 360 MV-22 Marine Corps aircraft, 48 Navy aircraft, and 52 CV-22 aircraft for USSOCOM (funded by USSOCOM and the Air Force). The program successfully completed Milestone III in the 1st Quarter of 2006, and IOC in March of 2007.																	
The production of the Navy's variant will begin during the FYDP. The configuration of this variant is a modification of the MV-22 and will perform the Carrier Onboard Delivery (COD) mission and include: (1) external conformal fuel tanks to provide the capability to meet the range requirements that the COD mission demands, (2) a high frequency radio to transmit/receive beyond line of sight over water, and (3) a public address system for use while transporting passengers.																	
P-40 corrections:																	
Prior Years:																	
Initial Spares: \$790.319.

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

Justification:

Basis for FY 2016 Budget Request: Provides funding to procure 19 MV-22's with support.

The V-22 Program is currently executing a Multi-Year Procurement (MYP) contract for production aircraft in FY 2013-FY 2017.

^(†) indicates the presence of a P-21

Footnotes:

⁽⁴⁾ FY 2008 included 2 GWOT funded MV-22 aircraft and 5 GWOT funded CV-22 aircraft. The span of delivery of aircraft in production lots with supplemental funded aircraft (i.e. GWOT and OCO) will exceed 12 months due to production capacity and necessity to meet currently scheduled MV-22 and CV-22 deliveries. In addition, the lack of advance procurement funding for supplemental aircraft means there is a 3-year (vice 2-year) production lead time.

⁽⁵⁾ FY 2011 included 1 OCO funded CV-22 aircraft with a planned delivery of May 2015.

(‡) Delivery rows marked with this symbol indicate that they are funded through a separate Line Item. See the respective components' exhibits for details, including the full delivery schedule.

"A" in the Delivery Schedule indicates the Contract Award Date.

Note: Due to space limitations, quantities in the Exhibit P-21 delivery calendar are truncated and rounded based on the maximum quantity in the calendar as follows. If the maximum quantity is less than or equal to than 9,999, all quantities are shown as each. If the maximum quantity is between 10,000 and 999,999 all quantities are shown in thousands. If the maximum quantity is between 1,000,000 and 999,999,999 all quantities are shown in millions (rounded to the nearest thousand).If the maximum quantity is equal or greater than 1,000,000,000 all quantities are shown in billions (rounded to the nearest million).

Footnotes:

(6) FY 2008 included 2 GWOT funded MV-22 aircraft. Deliveries occurred in Dec 2012 and May 2014. FY2008 also included 5 OCO funded CV-22 aircraft with all 5 aircraft having been delivered by Nov 2013. The span of delivery of aircraft in production lots with supplemental funded aircraft (i.e. GWOT and OCO) exceed the 12 months due to production capacity and necessity to meet currently scheduled MV-22 and CV-22 deliveries. In addition, the lack of advance procurement funding for supplemental aircraft means there is a 3-year (vice 2-year) production lead time.

(7) FY 2011 included 1 OCO funded CV-22 aircraft with a planned delivery of MAY 2015.

(8) Extended delivery cycle for MV-22 aircraft delivery for FY2013 Congressional Add (Operational Loss Aircraft)

(9) Extended delivery cycle for CV-22 aircraft delivery for FY2014 Congressional Add (Operational Loss Aircraft)

(10) Extended delivery cycle for MV-22 engine delivery for FY2013 Congressional Add (Operational Loss Aircraft).

(11) Extended delivery cycle for CV-22 engine delivery for FY2014 Congressional Add (Operational Loss Aircraft).

Description: The V-22 is a tilt-rotor vertical takeoff and landing aircraft currently being produced for joint service application. The program provides an aircraft to meet the amphibious/vertical assault needs of the Marine Corps, the strike rescue needs of the Navy, and supplements USSOCOM special mission aircraft. The aircraft is capable of flying 2,100 miles with one refueling, and gives the Services the advantage of a Vertical/Short Takeoff and Landing (V/STOL) aircraft that can rapidly self-deploy to any location in the world. The current procurement objective is 460: 360 MV-22 Marine Corps aircraft, 48 Navy aircraft, and 52 CV-22 aircraft for USSOCOM (funded by USSOCOM and the Air Force). The program successfully completed Milestone III in the 1st Quarter of 2006, and IOC in March of 2007. The Advance Procurement (AP) funding will be used to procure long lead CFE items (24 months or greater production lead time) such as raw materials (inclusive of steel, titanium, aluminum, composites), forgings, bearings, fittings, panel assemblies, actuators, liners, bracket assemblies, retainer assemblies, bushings, rib assemblies, frame assemblies, pump assemblies, buffers, empennage assemblies, unions, flight control computers, lightweight inertial navigation system, skin assemblies, advanced mission computers, tube assemblies, gearboxes, and airframe structural components. V-22 lead times for components have been as high as 40.6 months (empennage assemblies). Other specific material lead items are 130 degree heavy duty hex drive bolts (39.0M), remote transmitters (36.6M), drag strut actuator assemblies (35.8M), and steering unit supplier pull (35M). All of these long lead items are essential to maintaining the current schedule. Any reduction or delay in approval of advance procurement funding for CFE Airframe would result in a significant cost increase and schedule delay to the V-22 program. The production of the Navy's variant will begin during the FYDP. The configuration of this variant is a modification of the MV-22 and will perform the Carrier Onboard Delivery (COD) mission and include: (1) external conformal fuel tanks to provide the capability to meet the range requirements that the COD mission demands, (2) a high frequency radio to transmit/receive beyond line of sight over water, and (3) a public address system for use while transporting passengers.

*Title represents 1) the Number / Title for Items; 2) the Number / Title [DODIC] for Ammunition; and/or 3) the Number / Title (Modification Type) for Modifications.

Note: Totals in this Exhibit P-40 set may not be exact or add due to rounding.

Justification:

FY 2016 Advance Procurement funding is requested for the long-lead requirements associated with the procurement of 18 MV-22 aircraft in FY 2017. Airframe/CFE requirements are calculated on a termination liability basis, reflecting contractor's funding requirements for procurement of long lead parts and materials necessary to protect the delivery schedule.
